

PROTECT YOUR LIQUID ASSETS

Efficiently manage water usage with Tucor's precision flow technologies.

Efficiently Manage Your Water Usage With Tucor's Precision Flow Technologies.

Water scarcity and drought are some of the biggest challenges the Landscape Irrigation industry faces. Coupled with **increasing regulation and rising water costs**, finding a way to manage and conserve water is relevant to any irrigation stakeholder. Finding a way to **effectively** manage and conserve water is the real challenge, a challenge that requires **purposeful** innovation that answers the question, "How do I reduce water waste in a way that's simple and cost-effective?"

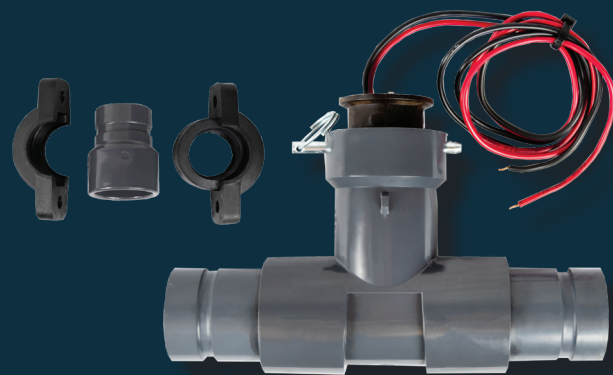

Tucor's Flow Line is a family of time-saving, high-quality products that **minimize** water waste, leaks, and the hassle of existing flow sensor technologies and **maximize** flow accuracy and visibility. At a time when reducing water consumption has never been more crucial, Tucor's flow line brings you a fast, cost-effective way to be compliant and save money.

ULTRA-ONE

- Durable, One-Piece Construction
- Reads Flows 0.22-33 GPM
- High-Value Solution for Drip & Leaks

UFM ASSEMBLY

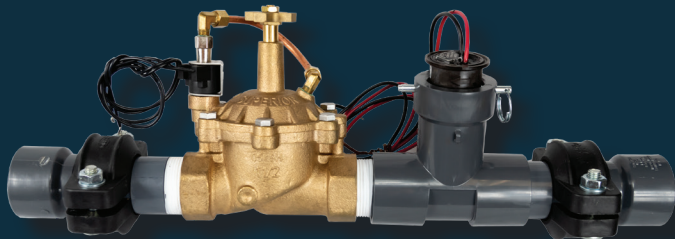

- Low-Flow Readings
- Time-Saving Quick-Connect Couplings
- Sizes: 1.5-4" with Unmatched Operating Ranges

*High Performing Ultrasonic,
Ultra-low Flow Technology
for Superior Monitoring
and Leak Detection.*

Tucor's Flow Line Integrates with any Irrigation Controller in the Industry.

UFMV ASSEMBLY

- Small Footprint
- Prevent Mainline Breaks
- Available Size: 1-3" with Four Valve Options

3D-FMV ASSEMBLY

- Save Installation Time & Trenching
- Easy Flow & Master Valve Retrofit
- One Easy-To Order Kit
